

Bibliography of Wu Wen-tsün

February 27, 2009

Books

1. Sur les espaces fibrés et les variétés feuilletées, *Actualités Sci. Ind.*, No. 1183, Publ. Inst. Math. Univ. Strasbourg 11, Hermann & Cie, Paris (1952)
2. Some applications of mechanics in geometry, (in Chinese), Chinese Youth Press, 1962.
3. A theory of imbedding, immersion, and isotopy of polytopes in a euclidean space. Science Press, Beijing (1965). Chinese version with an Appendix: The layout problem of printed circuits and integrated circuits, Science Press, Beijing, (1978).
4. “Nine Chapters in Arithmetic” and Liu Hui, (in Chinese, ed.), Beijing Normal University Press, Beijing, 1981.
5. Proceedings of the 1980 Beijing symposium on differential geometry and differential equations(co-editor with S. S. Chern), Science Press, Beijing, 1982.
6. Basic principles of mechanical theorem proving in geometries (Part on elementary geometries), (in Chinese, ed.), Science Press, Beijing (1984). English translation by D. M. Wang et al, Springer (1994).
7. On triangles with two equal bisectors, (in Chinese, ed. with X.L. Lü), People’s Education Press, Beijing (1985).
8. Selected works of Wu Wen-tsün, (in Chinese, ed.), Shandong Science and Technology Press, Jinan, 1987.
9. Rational homotopy type — A constructive study via the theory of the I^* -measure, *Lect. Notes in Math.*, No. 1264, Springer Verlag, Berlin (1987).
10. Historical studies on “Mathematical Treatise in Nine-Chapters (Shu-Shu-Jiu-Zhang)” (in Chinese, ed.), Beijing Normal University Press, Beijing, 1987.

11. New developments of today mathematics — a collection of articles on Liu Hui seminar of mathematics (in Chinese, ed.), Anhui Science and Technology Press, Hefei, 1988.
12. Chinese Mathematics onto the 21st Century, (Ed. with Cheng Min-de), Peking University Press, Beijing, 1991.
13. Computer Mathematics, (Proc. Special Program at Nankai Inst. of Math. in Tianjin 1991, Ed. with Hu Guoding), World Scientific, Singapore, 1993.
14. Proc. 1992 International Workshop on Mathematics Mechanization in Beijing, (Ed. with Cheng Min-de), Intern. Acad. Publishers, Beijing, 1992.
15. Studies on Liu Hui, (in Chinese, ed. with Bai Shangshu, Li Di and Shen Kangshen), Shanxi People's Education Press and Nine-Chapters Press, 1993.
16. Wu Wentsün on Mathematics Mechanization, (in Chinese), Shangdong Education Press, Shangdong, 1996.
17. Mathematics Mechanization, Science Press/Kluwer Pub., 2000; Chinese Version, Science Press, 2003.

Papers

1. Note sur les produits essentiels symétriques des espaces topologiques. C. R. Acad. Sci. Paris 224, 1139-1141(1947).
2. On the product of sphere bundles and the duality theorem modulo two. Ann. of Math. (2) 49, 641-653 (1948).
3. Sur L'existence d'un champ d'éléments de contact ou d'une structure complexe sur une sphère. C. R. Acad. Sci. Paris 226, 2117-2119(1948).
4. Sur les classes caractéristiques d'un espace fibré en sphères. C. R. Acad. Sci. Paris 227, 582-584(1948).
5. Sur le second obstacle d'un champ d'éléments de contact dans une structure fibrée sphérique. C. R. Acad. Sci. Paris 227, 815-817(1948).
6. Sur la structure presque complexe d'une variété différentiable réelle de dimension 4. C. R. Acad. Sci Paris 227, 1076-1078 (1948).
7. Sur la structure presque complexe d'une variété différentiable réelle. C. R. Acad. Sci. Paris 228, 972-973(1949).
8. Classes caractéristiques et i-carrés d'une variété. C. R. Acad. Sci. Paris 230, 508-511(1950).

9. Les i-carrés dans une variété grassmannienne. C. R. Acad. Sci. Paris 230, 918-920(1950).
10. Sur les puissances de Steenrod. Colloque de Topologie de Strasbourg. 1951, no. IX, 9pp. La Bibliothèque Nationale et Universitaire de Strasbourg, 1952.
11. Topological invariants of new type of finite polyhedrons. Acta Math. Sinica 3, 261-290(1953).(in Chinese, English summary).
12. On Pontrjagin classes I. Acta Math. Sinica 3, 291-315(1953) (in Chinese, English summary) 17-521. Sci. Sinica 3, 353-367(1954). Amer. Math. Soc. Translations, Ser. 2, 92(1970), 49-62.
13. On squares in Grassmannian manifolds. Acta Sci. Sinica 2, 91-115(1953). Amer. Math. Soc. Translations, Ser. 2, 38(1964), 235-258.
14. On squares in Grassmann manifolds. J. Chinese Math. Soc. 2(1953) 205-230. (in Chinese, English summary) 17-396.
15. Proof of a certain conjecture of H. Hopf, Acta Math. Sinica 4(1954), 491-500.
16. "On Pontrjagin classes II", Acta Math. Sinica 4(1954). 171-199(in Chinese, English summary). Amer. Math. Soc. Translations, Ser. 2, 92(1970), 63-92.
17. On Pontrjagin classes. III. Acta Math. Sinica 4(1954), 323-346. (in Chinese, English summary) 18-225. American Mathematical Society Translations, Ser. 2, Vol. II, pp. 155-172, American Mathematical Society, Providence R. I. 1959.
18. On Pontrjagin classes. IV. Acta Math. Sinica 5(1955), 37-63. (in Chinese, English summary). Amer. Math. Soc. Translations, Ser. 2, 92, 93-121.
19. On Pontrjagin classes. V. Acta Math. Sinica 5(1955), 401-410. (in Chinese, English summary). Amer. Math. Soc. Translations, Ser. 2, 38(1964), 259-268.
20. On the realization of complex in euclidean spaces I. Acta Math. Sinica 5(1955), 505-552. (in Chinese, English summary). Amer. Math. Soc. Translations, Ser. 2, 78(1968), 137-184.
21. On the imbedding of polyhedrons in Euclidean spaces. Bull. Acad. Polon. Sci. C1. III. 4(1956)573-577.
22. On the realization of complexes in euclidean spaces. II. Acta Math. Sinica 7(1957), 79-101 (in Chinese, English summary). Amer. Math. Soc. Translations, Ser. 2, 78(1968), 185-208.
23. On the Φ_p -classes of a topological space. Sci. Record (N. S.), 1(1957), 377-380.

24. On the relations between smith operations and Steenrod powers. (in Chinese, English summary) *Acta Math. Sinica* 7(1957), 235-241. *Fund. Math.* 44(1957), 262-269. *Amer. Math. Soc. Translations, Ser. 2*, 38(1964), 269-276.
25. On the realization of complexes in euclidean spaces. III. *Acta Math. Sinica* 8(1958), 79-94. (in Chinese, English summary). *Sci. Sinica* 8(1959), 133-150.
26. On the reduced products and the reduced cyclic powers of a space. *Jber Deutsch. Math. Verein.* 61(1958), Abt. 1, 65-75.
27. On the dimension of a normal space with countable base. *Sci. Record (N. S.)* 2(1958), 65-69.
28. On the isotopy of C^r -manifolds of dimension n in Euclidean $(2n + 1)$ -space. *Sci. Record (N. S.)* 2(1958), 271-275.
29. On the realization of complexes in Euclidean spaces. *Sci. Sinica* 7(1958), 365-387.
30. On the isotopy of a complex in a Euclidean space. I. (in Chinese .English summary). *Acta Math. Sinica* 9(1959), 475-493. *Sci. Sinica* 9(1960), 21-46.
31. Topologie combinatoire et invariants combinatoires. *Colloq. Math.* 7(1959), 1-8.
32. On certain invariants of cell-bundles. *Sci. Record (N. S.)* 3(1959), 137-142.
33. A remark on the fundamental theorem in the theory of games. *Sci. Record (N.S.)* 3(1959), 229-233.
34. On the isotopy of a finite complex in a Euclidean space. I, II. *Sci. Record (N.S.)* 3(1959), 342-351.
35. On non-cooperative games with restricted domains of activities. *Acta Math. Sinica* 11(1961), 47-62 (in Chinese); translated as *Chinese Math.* 2(1962), 54-76. Russian version in *Beskonec. Anagonist. Igrы*, 1963, 459-488.
36. On a theorem of Leray. *Acta Math. Sinica* 11(1961), 348-356(in Chinese); *Chinese Math.* 2(1962), 398-410. *Sci. Sinica* 10(1961), 793-805.
37. Essential equilibrium points of n -person non-cooperative games(with Jiang Jia-he), *Sci.Sinica*, 12 (1962) 1307-1322.
38. The characteristic classes of certain real quadrics(with Li Pei-hsin), *Acta Math. Sinica*, 12 (1962) 203-215 (in Chinese). Translated in *Chinese Math.*, 3 (1963) 218-231.
39. On the imbedding of orientable manifolds in a Euclidean space. *Sci. Sinica* 12(1963), 25-33.

40. Rotations in Euclidean space. (in Chinese) Shuxue Jinzhan 6(1963), 96-97.
41. A theorem on immersion. Sci. Sinica 13(1964), 160.
42. On the immersion of C^∞ -3-manifolds in a Euclidean space. Sci. Sinica 13(1964), 335-336.
43. On the notion of imbedding classes. Sci. Sinica 13(1964), 681-682.
44. On the imbedding of manifolds in a Euclidean space I. Sci. Sinica 13(1964), 682-683.
45. On complex analytic cycles and their real traces. Sci. Sinica 14(1965), 831-839.
46. On critical sections of convex bodies. Sci. Sinica 14(1965), 1721-1728.
47. Algebraic varieties with dual rational dissections. (in Chinese) Shuxue Jinzhan 8(1965), 402-409.
48. The Chern characteristic classes on an algebraic variety. (in Chinese) Shuxue Jinzhan 8(1965), 395-401.
49. A mathematical problem in the design of integrated circuits, Math. in Practice and Theory, (1973) 20-40. (in Chinese).
50. Planar imbedding of linear graphs, Kexue Tongbao, (1973) 226-228. (in Chinese).
51. Homology classes that contain singularities of type S_k (in Chinese), Acta Math. Sinica, 17(1974), 28-37.
52. On singularities of S_k -type, Acta Math. Sinica (1975) (in Chinese).
53. On universal invariant forms, Acta Math. Sinica, 18(1975), 263-273 (in Chinese).
54. A new functor in algebraic topology, Kexue Tongbao, 20(1975), 311-312 (in Chinese).
55. Theory of I^* -functor in algebraic topology - Real topology of homogeneous spaces, Acta Math. Sinica 18(1975), 162-172 (in Chinese).
56. Theory of I^* -functor in algebraic topology - Real topology of fibre squares, Sci. Sinica, 18(1975), 464-482.
57. Theory of I^* -functor in algebraic topology - Effective calculation and axiomatization of I^* -functor on complexes, Sci. Sinica, 19(1976), 647-664.
58. The layout problem of printed circuits and integrated circuits, Appendix to A theory of imbedding, immersion and isotopy of polytopes in a Euclidean space, (1977) 213-261 (in Chinese).

59. The out-in complementary principle, (in Chinese), in Achievements in Science and Technology of Ancient China (1977), 80-100.
60. On the decision problem and the mechanization of theorem-proving in elementary geometry, *Scientia Sinica* 21 (1978) 159-172. Re-published in *Automated Theorem Proving: After 25 Years* (Eds. W.W. Bledsoe & D. W. Loveland), (1984) 213-234. Chinese version in *Sci. Sinica*, 20(1977), 507-516.
61. Theory of I^* -functor in algebraic topology- I^* -functor of a fiber space(with Wang Qi-ming), *Sci.Sinica*, 21 (1978) 1-18.
62. Mechanical theorem proving in elementary differential geometry (in Chinese), *Kexue Tongbao*, 23(1978), 523-524.
63. Layout problems in printed circuits and intergrated circuits (in Chinese), Appendix in Chinese version of [3], 213-261. 1979
64. On the mechanization of theorem-proving in elementary differential geometry, *Scientia Sinica*, Math. Supplement (I), 94-102 (1979).(in Chinese).
65. On the mechanization of theorem proving in elementary differential geometry (in Chinese),*Sci. Sinica*, Special Issue(I) on Math., 94-102. 1980.
66. On calculability of I^* -measure with respect to complex-union and other related constructions, *Kexue Tongbao*, 25(1980) 196-198 (in Chinese); *Kexue Tongbao* 25(1980), 185-188.
67. de Rham-Sulliven measure of spaces and its calculability, in *Proc. Chern Symposium*, (1980), 229-245.
68. A constructive theory of algebraic topology - Part I. Notions of measure and calculability, *J. Systems Science and Math. Science*. 1(1981), 53-68.
69. Investigations on the Original Proofs about "Sea-Island Arithmetic", (in Chinese), in "Nine Chapters in Arithmetic" and Liu Hui, Ed. Wu Wen-tsün, Beijing Normal University Press, Beijing, (1981) 58-75.
70. Mechanical theorem proving in elementary geometry and differential geometry, in *Proc.1980 Beijing DD-Symposium*, Beijing, v.2, 1073-1092 (1982).
71. On the double-difference theory in measurement-studies of ancient China with criticisms about methodology in study of history of mathematics, (in Chinese), in *Monographs on History of Science and Technology*, No. 8, Shanghai Science Press, Shanghai, (1982) 10-30.
72. Toward mechanization of geometry — Some comments on Hilbert's "Grundlagen der Geometrie", *Acta Math.Scientia*, 2 (1982) 125-138. Chinese version 126-136.

73. Some remarks on mechanical theorem-proving in elementary geometry, *Acta Math. Scientia* 3 (1983) 357-360.
74. The out-in complementary principle, in *Ancient China's Technology and Science*, Foreign Languages Press, Beijing(1983), 66-89.
75. de Rham theorem from constructive point of view, in *Proc. 1981 Shanghai Symposium on Differential Geometry and Differential Equations*, Science Press, Beijing, (1984) 497-528.
76. Chern classes on algebraic varieties with arbitrary singularities, in *Several Complex Variables*, Birkhausser Boston, Mass., (1984) 247-249.
77. Some recent advance in mechanical theorem-proving of geometries, in *Automated Theorem Proving:After 25 Years* (Eds.W.W.Bledsoe & D.W. Loveland), *Contemp. Math.*, AMS, 29(1984) 235-242.
78. Basic principles of mechanical theorem-proving in elementary geometries, *J.Sys.Sci. & Math.Scis.*,4 (1984) 207-235. Re-published in *J. Automated Reasoning*, 2 (1986) 221-252.
79. A constructive theory of differential algebraic geometry based on works of J. F. Ritt with particular applications to mechanical theorem-proving in differential geometries. *Differential Geometry and Differential Equations*, *Lect. Notes in Math.* No. 1255, Springer (1984) 173-189.
80. On zeros of algebraic equations — an application of Ritt principle, *Kexue Tongbao* 31 (1986) 1-5. Chinese version, 30(1985), 881-883.
81. On the planar imbedding of linear graphs I, *J. Sys. Sci. & Math. Scis.*, 5(1985), 290-302.
82. The renaissance of constructive mathematics, (in Chinese), *Adv. in Math.*, 14(1985) 334-339.
83. On the planar imbedding of linear graphs II, *J. Sys. Sci. & Math. Scis.*, 6(1986), 23-35.
84. A mechanization method of geometry and its applications I. Distances, areas, and volumes in euclidean and non-euclidean geometries, *Kuxue Tongbao* 32 (1986) 436-440.
85. A mechanization method of geometry I. Elementary geometry, *Chinese Quart. J. Math.*, 1 (1986) 1-14, *Errata and Addenda*, *ibid*, 2 (1987) 20.
86. A mechanization method of geometry and its applications I. Distances, areas, and volumes, *J.Sys.Sci. & Math.Scis.*,6 (1986) 204-216.
87. A general description of the SOLVER package system, (in Chinese), *Math. in Practice and Theory*, (1986 No.2), 32-39.
88. Examples of applications of the SOLVER package system, (in Chinese), *Math. in Practice and Theory*, (1986 No.3), 1-11.

89. Some remarks on jet-transformations, *Bull. Soc. Math. Belgique*,38 (1986) 409-414.
90. Recent studies of the history of Chinese mathematics, in *Proc. ICM 1986*, Amer. Math. Soc.,(1987) 1657-1667.
91. . On the Constructive and Mechanical characteristics of Chinese traditional mathematics in view of "Mathematical Treatise in Nine Chapters" of Qin Jiu-shao, (in Chinese), in Qin Jiu-shao and "Mathematical Treatise in Nine Chapters", Ed. Wu Wen-tsün, Beijing Normal University Press, Beijing, (1987) 73-88.
92. On Chern numbers of algebraic varieties with arbitrary singularities, *Acta Math. Sinica, New Ser.*, 3, (1987) 227-238.
93. A mechanization method of geometry and its applications II. Curve pairs of Bertrand type, *Kuxue Tongbao* 32 (1987) 585-588. Chinese version 1281-1284.
94. On reducibility problem in mechanical theorem proving of elementary geometries, *Chinese Quarterly J. of Math.*, 2 (1987) 1-19, also in *MM-Res.Preprints*, No.2, (1987) 18-36.
95. A zero structure theorem for polynomial-equations-solving and its applications, *MM-Res.Preprints*, No.1 (1987) 2-12.
96. Mechanical derivation of Newton's Gravitational Laws from Kepler's Laws, *MM-Res. Preprints*, No.1, (1987) 53-61.
97. On the special features of constructiveness and mechanical character of chinese traditional mathematics as viewed from "Mathematics in Nine Chapters", (in Chinese), In [10](1987),78-88.
98. A mechanization method of geometry and its applications III. Mechanical proving of polynomial inequalities and equations-solving, *MM-Res. Preprints*, No.2, (1987) 1-17, also in *Sys.Sci.& Math.Scis.*, 1 (1988) 1-17.
99. A mechanization method of geometry and its applications IV. Some theorems in planar kinematics, *Sys.Sci. & Math.Scis.*, 2 (1989) 97-109.
100. On the foundation of algebraic differential geometry, *MM-Res. Preprints*, No.3 (1989) 1-26, also in *Sys.Sci.& Math.Scis.*, 2 (1989) 289-312.
101. Some remarks on characteristic-set formation, *MM-Res.Preprints*, No.3 (1989) 27-29.
102. A review and prospect of mechanical theorem proving, (in Chinese), in *New Developments of Today Mathematics – A Collection of Articles on Liu-hui Seminar of Mathematics*, (Ed. Wu Wen-tsün), Anhui Science and Technology Press, Hefei, (1989) 181-188.

103. On the generic zero and Chow basis of an irreducible ascending set, MM-Res. Preprints, No.4 (1989) 1-21.
104. A mechanization method of geometries and its applications V (with Wu Tianjiao). Solving transcendental equations by algebraic methods, MM-Res. Preprints, No.3 (1989) 30-32.
105. A mechanization method of geometry and its applications VI. Solving inverse kinematic equations of PUMA-type robots, MM-Res. Preprints, No.4 (1989) 49-54.
106. On a projection theorem of quasi-varieties in elimination theory, MM-Res. Preprints, No.4 (1989) 40-48. Also in Chinese Annals of Math., 11B (1990) 220-226.
107. On the chemical equilibrium problem and equations-solving, MM-Res. Preprints, No.4 (1989) 1-21. Also in Acta Math. Scientia, 10 (1990) 361-374.
108. Decomposition theorems for the zero-set of an ordinary or differential polynomial set and their applications, IV int. conf. on Computer Algebra in Physical Research 1990, (Eds. D.V. Shirkov et al), (1991) 198-205.
109. Automation of Theorem-Proving, MM-Res. Preprints, No.5 (1990) 1-4. Also in Workshop on Advanced Computers for Artificial Intelligence, Beijing (1990) 11-15.
110. On the construction of Groebner basis of a polynomial ideal based on Riquier-Janet theory, MM-Res. Preprints, No.5 (1990) 5-22. Also in Sys.Sci. & Math.Sci., 4 (1991) 193-207.
111. A survey of developments of mathematics mechanization in China, in Chinese Mathematics into the 21st Century, (Ed. Wu Wen-tsün & Cheng Min-de), Peking University Press, Beijing (1991) 15-40.
112. Mechanical theorem proving of differential geometries and some of its applications in mechanics, MM-Res. Preprints, No.6 (1991) 1-22. Also in J. Automated Reasoning, 7 (1991) 171-191.
113. On a finiteness theorem about optimization problems, MM-Res. Preprints, No. 8(1992) 1-18.
114. A report on mechanical geometry theorem proving, Progress in Natural Science, 2 (1992) 1-17.
115. On the char-set method and the linear equations method of non-linear polynomial equations-solving, in Proc. Intern. Workshop on Math. Mechanization(1992),101-109.
116. Equations-solving and theorem-proving: Zero-set formulation and ideal formulation, Proc. Asian Math. Conf. 1992, 1-10.

117. A mechanization method of equations-solving and theorem-proving, *Adv. in Comp. Res.*, 6(1992), 103-138.
118. On problems involving inequalities, *MM-Res. Preprints*, No. 7(1992), 1-13.
119. On a linear equation method of non-linear polynomial equations-solving, *MM-Res. Preprints*, No.6 (1991) 23-36. Errata, loc.cit. No.7 (1992). *Sys. Sci. & Math. Sci.*, 6(1993) 1-12.
120. On the development of polynomial equations solving in China, *Proc. 1991 Nankai seminar on Mathematics Mechanization*, Singapore (1993)
121. On a hybrid method of polynomial equations solving, *MM-Res. Preprints*, No. 9 (1993) 1-10.
122. On Surface-fitting problem in CAGD, *MM-Res. Preprints*, No. 10 (1993) 1-10.
123. On a finiteness theorem about problems involving inequalities, *Sys. Sci. & Math. Scis.*, 7 (1994)
124. On the algebraic surface-fitting problem in CAGD, (in Chinese, with Wang Ding-kang), *Mathematics in practice and theory*, No. 3(1994), 26-31.
125. Some remarks on factorization and GCD of multivariate polynomials, *MM-Res. Preprints*, No. 11(1994), 1-14.
126. Char-set method of polynomial equation-solving and its applications, *Proc. Asian Symposium on Computer Mathematics(1995)*, 11-21.
127. Geometry problem-solving and its contemporary significance, in *Proc. First Asian Tech. Conf., Assoc. of Math. Educators*, Singapore, (1995), 67-62.
128. Central configurations in planet motions and vortex motions, *MM-Res. Preprints*, No. 13(1995) 1-14.
129. On constructive algebraic geometry, *MM-Res. Preprints*, No. 16 (1998) 1-3.
130. Optimization Problem in Technology and Education, *Proc. Of ATCM'99*, pp. 19-31, ATCM Inc, 1999.
131. On Algebraico-Differential Equations-Solving, *J. Syst. Sci. & Complexity*, 17(2004) 153-163.
132. On "Good" Bases of Algebraico-Differential Ideals, *Differential Equations with Symbolic Computation*, 343-350, 2005
133. On the Construction of Groebner Basis of a Polynomial Ideal Based on Riquien-Janet Theory, *Differential Equations with Symbolic Computation*, 351-368, 2005

134. On Wintener's conjecture about central configurations, *Computer Algebra and Geometric Algebra with Applications*, 1–4, 2005
135. Inoubliables souvenirs de Rene Thom, *Reue thom (1922-2002)*, 139-141, 2005
